CAD Image Description: CAD Image is the only high performance CAD file viewer of its kind. It will display 2D and 3D CAD files (DXF, DWG, DXE, DWF, DWF.5, SLD, JPG) with features no other software can match. CAD Image can do all the things other software can do, but much faster and easier. It is not only fast, it is also accurate - that's what makes it perfect for use in industry

## CAD Image

Key macro for Microsoft Visual Studio allows you to work with Unicode strings in Visual Basic, Visual C++ and Microsoft Visual Studio.NET projects. The codes generated are identical to those produced by Delphi, for example, you can use the line: Line := ""; or Line := 'Hello, World!'; ♦ It is not possible to use Unicode characters as in Pascal and C. The Coded Character Set (CCS) has been used for the string literals. ♦ Batch processing: Macro works only for "Program" files or "Project" files. ♦ It is necessary to place an import directive as follows: ``#import directive(File)``; ♦ The macro works only for the first line of the file. How to use: 1) Open your Microsoft Visual Studio project file or solution file in your favorite text editor. 2) Open a text file. 3) Copy Key macro to the file. 4) Start Visual Studio and open your project or solution file. 5) You can use Key macro without any additional codes. License: MDCL (Macro Definition Language) is a licensed proprietary software. It is possible to use Macro Definition Language in any type of software but only for the end-user licenses. Macro Definition Language can be used: ♦ For royalty free license please contact us by e-mail [info@cadsofttools.com](mailto:info@cadsofttools.com) Please note that the MDCL is not included in CAD Image Download With Full Crack. Key macro for Borland Delphi can be purchased separately from Borland Softwares. KEYMACRO Description: Key macro for Borland Delphi allows you to work with Unicode strings in Borland C++ Builder projects. The codes generated are identical to those produced by Delphi, for example, you can use the line: Line := ""; or Line := 'Hello, World!'; ♦ It is not possible to use Unicode characters as in Pascal and C. The Coded Character Set (CCS) has been used for the string literals. ♦ Batch processing: Macro works only for "Form" files. ♦ It is necessary to place an import directive as follows: ``#import directive(File)``; ♦ The macro works only for the first line of the file. How to use: 1) Open your Borland Delphi project file in your favorite text editor. 2) 77a5ca646e
